On Human Origins and the Future of Humanity

PROF. KATHERINE RICHARDSON

Professor in Biological Oceanography, Globe Institute & Leader Sustainability Science Centre, University of Copenhagen
Leader, Queen Margrethe's and Vigdís Finnbogadóttir's Interdisciplinary Research Centre on Ocean, Climate, and Society
PI Center for Macroecology, Evolution, and Climate

TALK TITLE: Planetary Boundaries: A tool to guide management of Human-Earth interactions

Katherine Richardson is a professor in biological oceanography at the University of Copenhagen, where she leads the Sustainability Science Centre (www.sustainability.ku.dk) and Queen Margrethe's and Vigdís Finnbogadóttir's Interdisciplinary Research Centre on Ocean, Climate, and Society (www.rocs.ku.dk). Her research focuses on the importance of biological processes in the ocean for the uptake of CO₂ from the atmosphere and how ocean biology, including diversity, contributes to ocean function in the Earth System. Katherine is also a core developer of the Planetary Boundaries framework.

CELEBRATING THE 50TH ANNIVERSARY
OF THE DISCOVERY OF LUCY
